

Reliance Globalcom DataCenter|Connect

Gartner claims that “Cloud computing and data center consolidation” are key issues on the minds of CIOs.

With the adoption of server virtualization, clustering, and other technologies, the focus and importance of the data center is greater than ever. Minimizing the cost of downtime to ensure operational continuity is a critical element for businesses and IT organizations which continue to be held accountable for the availability of their data and applications. Not only is availability key, but so also are flexibility and simplicity of the overall solution design and architecture.

Reliance Globalcom has built a world-class, intelligent, low latency network with connectivity to major data centers across the globe.

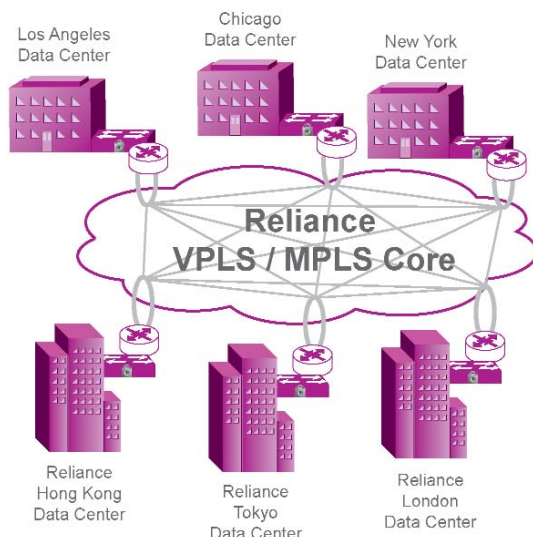

DataCenter|Connect will provide you with low latency connectivity between key global locations. Reliance Globalcom owns the world’s largest private undersea cable system spanning 65,000 kms which is seamlessly integrated with Reliance Communications’ 190,000+ kms of domestic optic fiber providing a robust global service delivery platform connecting 40 key business markets in India, the Middle East, Asia, Europe, and

the U.S. Reliance Globalcom is a specialist at providing high-performance communications solutions to diverse, high-volume locations worldwide.

We offer you point-to-point, multipoint, full-mesh solutions and Ethernet services, with the following benefits:

- A single connection from your data center to our international cloud with DataCenter|Connect connects you to major global business destinations
- Flexibility to connect your multiple data centers or HQ and branch locations and integrate with your existing provider solution
- Highly available and reliable service for your primary or secondary connectivity needs
- Easily scalable bandwidth allowing you to purchase exactly what you need
